

We've been on this journey for a while, building **high-performance travel and mobility units** that meet your customers' needs and help them reach new milestones. We're just getting started!

At Pride Mobility, we believe in **thinking BIG**. That's why we're thrilled to introduce our latest innovation - the **PX4**, a mobility scooter **loaded with features** and destined to exceed expectations by leaps, bounds, and miles.

The PX4 features an impressive **500-pound weight capacity**, a top speed of up to **9.3 mph**, a **23.4-mile battery range**, and since it is equipped with a **full suspension system**, it's perfect for all-day travel.

Our PX4 will be the first of its kind to utilize **Near-Field Communication (NFC) technology** for its ignition system. Simply place or tap the NFC key fob near the receiver on the side of the tiller to start the scooter. This technology will **enhance the user experience** while providing additional security.

With **more room to breathe**, the PX4 will offer your customers every opportunity to unwind, whether it's a day out in the sun with the family or visiting friends around the block. With a water-resistant user interface and an enhanced lighting package, you don't need to sweat the small stuff. **Relax and enjoy the ride with the PX4!**

AVAILABLE VINYL ACCENT COLORS
