Active Care Fixed Height Bed

Safely enter and exit the bed from a full chair position with the push of ONE button.

Since the inception of the hospital bed - one of the biggest challenges for caregivers and patients is safely getting in and out of the bed. Today, Med-Mizer has innovated the *ActiveCare* Bed to solve this challenge.

- One ButtonSafeTurn Exit an exclusive feature that fully automates the bed to turn into a chair and allows the patient to enter and exit the bed safely.
- **Full Chair position** The full chair position allows the patient to sit in the bed for added comfort. Watch TV, eat meals, and socialize with family and friends while remaining comfortably in bed.
- **Powered Recliner** The bed can be positioned to mimic a recliner.
- **RollBack in Place™** The head of the bed can articulate to almost 90 degrees with rollback in place to alleviate shearing/friction in the lower back.
- **Fixed Height** comes with a low height of around 19" (standard height of a wheelchair) and can have casters added (3" and 5") to raise the bed height to allow the end user an appropriate height to stand up and sit down.

ActiveCare ® Fixed Height Bed SPECIFICATIONS
